## Litter-free Business Checklist

The Silver City Pick It Up-Toss No Mas Program encourages businesses to keep their property, parking lots, adjacent sidewalks, and street gutters litter free.

### Business Pledge Checklist

- Make sure trash receptacles are of adequate size for the amount of trash that is generated at your business.
- Place more than one trash can at your business if one is not enough. Trash cans should be movable so that they can be re-located in more convenient areas of your property for trash disposal.
- Make sure receptacles are securely covered to prevent spillage or wind blowing trash out of the trash can.
- Schedule employees to scan/clean up trash on your property throughout the day or at shift changes.
- Provide employees with proper equipment to clean up such as brooms/dustpans, rake, trash pickers, gloves, and safety vest if needed.
- Check loading/unloading areas and dumpsters for litter regularly to make sure litter doesn't accumulate in these areas.
- Encourage employees to clean up litter when they see it to keep your business and public rights of way clean and litter free.
- Make trash cleanup fun by having employees adopt areas of your business property to keep clean. This can be a fun way to create a competition for litter removal while also boosting morale.
- Schedule a Litter Prevention Consultation with Pick It Up-Toss No Mas Program Coordinator when needed to get a personalized assessment specific for your needs.
